EXPERIENCE

Visa

Software Engineer Intern

May 2020 – Present

Remote

- Participated in the Global Intern Chase Challenge to present an innovative payment solution that will accelerate cash displacement.
- Build a data visualization solution that leverages Visa APIs through a website.

Center for Large-scale Scientific Simulations

Student Technician

Oct. 2019 – Present

College Station, TX

- Designing and converting a preexisting C++ codebase into an open-sourced library.

Mays Innovation Research Center

Software Assistant

Sept. 2018 – Aug. 2019

College Station, TX

- Fulfilled features and optimize existing ones to drive maximum performance for inhouse software.
- Used test-driven development, code reviews and continuous integration to deliver high quality software, and rapidly fix bugs as they come up.

University of Cyprus

Researcher Intern

Jun. 2019 – Jul. 2019

Nicosia, CY

- Utilized Python and Scrapy framework to retrieve content and metadata from archived news articles then store data into MongoDB collection.
- Applied statistical methods on the time series of the extracted data in order to visualize the evolution of the language of fake news articles in time.

Oak Ridge National Laboratory

Researcher Intern

May 2017 – Jul. 2017

Oak Ridge, TN

- Implemented automated testing of SAP programs to streamline inhouse software development lifecycle (SDLC) processes.
- Involved in the planning, review, and development of testing programs and documentation of results.

Make Me Modern, Inc

Web Design Juggernaut (Student Internship)

Apr. 2017 – May 2017

Knoxville, TN

- Built web sites and applications by writing code (PHP, HTML, CSS, Javascript) and configuring and extending content management software (WordPress).
